

Project Design Phase
Proposed Solution Template

Date	06 July 2026
Team ID	SWTID-2026-2221
Project Name	Automated Employee Onboarding & Offboarding System
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Organizations face delays and manual effort in employee onboarding and offboarding. Employee records, approvals, task assignments, and notifications are handled manually, leading to errors, lack of transparency, and inefficient tracking.
2.	Idea / Solution description	Develop an Employee Management System using ServiceNow App Engine Studio . The application automates employee onboarding and offboarding through custom tables, Flow Designer workflows, manager approvals, email notifications, HR/IT/Security task creation, and Access Control Lists (ACLs).
3.	Novelty / Uniqueness	Provides a centralized platform that integrates employee management, workflow automation, approvals, notifications, and security within a single ServiceNow application, reducing manual intervention.
4.	Social Impact / Customer Satisfaction	Improves employee experience with faster onboarding and offboarding, reduces HR workload, increases transparency, and ensures timely completion of organizational processes.
5.	Business Model (Revenue Model)	Can be deployed as an enterprise HR workflow solution for organizations using ServiceNow. Revenue can be generated through software licensing, implementation services, customization, and annual maintenance.
6.	Scalability of the Solution	The solution can be extended to include leave management, attendance, payroll integration, asset management, employee self-service, and additional HR workflows without major architectural changes.
